The Yohetta Wilderness area is one of the very few pristine wilderness areas still left in the world. What is very unique to this wilderness is its proximity to Vancouver and Whistler. It is only one hour's flight from Whistler, crossing the most spectacular mountain scenery which you can imagine. You will fly over ice fields, glaciers, massive rock cliffs and mountain lakes, as well as glacier-fed rivers. This will bring you into the rain shadow of the Coast Mountains. Here, in a sunny climate, the *Chilcotin Mountains* are rich with wildlife. In the valleys, the clear mountain lakes are full of the feisty trout. Isolated and surrounded by these beautiful mountains on *Tuzcha Lake* are the **Yohetta Lodge and Wilderness Camp**.

Surrounding this is an area of spectacular beauty, consisting of 1,000 square miles of wilderness, most of which is in the *Tsy'los* and *Nuntsi* wilderness parks.

The Southern part is pristine mountain wilderness, while the Northern area encompasses tree-covered hills and mountains and shallow lakes known as the *Brittany Triangle*. This is the home of the mysterious herd of *Chilcotin Wild Horses*.

Our vision is to share this treasure with those who have a sense of adventure and appreciation for true wilderness. This part of God's creation is unique in its visual appeal and pristine character. Our staff work here because they have invested a part of their soul in this beautiful wilderness and are excited to show this treasure off to those with similar passions.

This is not a Sunday outing, but you will never be the same after experiencing an adventure with us at **Yohetta**. Your soul will sense an awesome serenity at the same time as your heart will be pumping with adrenalin, as you indulge in the essence of this wilderness.

Two words can describe the landscape we call home: *vast* and *untouched*. There are few places left in this world where you can walk on never-before touched soil, breathe crisp, clean mountain air, and listen to nature without distraction. Our home is lush green valleys, snow-capped mountains, sparkling glacier-fed rivers and crystal clear lakes. Wildlife is abundant here; this is what our forefathers saw when they came west for the first time. The natural beauty can't be captured on film, it is far too encompassing. For many this is a northern paradise they've only dreamt of - for you, this can be reality. You can find us in the native songs, the local legends and you can find us just for yourself. We invite you now to experience this very special place. *There's a warm fire waiting.*

SOME YOHETTA ACTIVITIES WE OFFER:

- Horseback riding – Lodge based
- Horseback pack trips
- Fishing – local lakes or remote lakes
- Hiking – Lodge based or wilderness trips
- Photography trips
- Botany and game viewing trips
